The Association of the British Pharmaceutical Industry (ABPI) represents companies in Britain that research, develop, manufacture and market prescription medicines. Britain is a world leader in pharmaceuticals, first of the world’s top 5. All solid selling medicines were developed in the UK and over 80% of the medicines and vaccines supplied to the National Health Services are produced by ABPI member companies.

BP is one of the world’s largest oil and petrochemical groups. BP’s main activities are the exploration and production of crude oil and natural gas, refining, marketing, supply and transportation and manufacturing and marketing of petrochemicals. The company is a global leader in the manufacture and use of solar photovoltaic products.

The pharmaceutical industry is constantly developing new safer and more effective treatments for many diseases which affect people all over the world. The Association and its member companies actively support the study of science in schools and colleges and work to provide information on real-life applications of science and technology.

In 1965, the Chemical Industry Education Centre, CHEC, was established as a joint venture between the University of York and the Chemical Industries Association (CIA), the UK trade association for the chemical industries. CHEC aims to enhance understanding of the chemical industry, principally by providing existing high-level science teaching and learning resources and parallel programmes of professional development for teachers and students. CHEC works with the NLE by bringing together a trade association and an employers’ federation.

Large and small chemical companies from all parts of the United Kingdom pay membership fees to CIA, whose purpose it is to support the UK chemical industry in maintaining its successful operation and development. The University of York has an excellent international reputation for science education in terms of research work and curriculum development, typified by the Students’ GCSE Science Course and the Advanced Chemistry Course.

The Royal Society of Chemistry is the UK’s leading professional body for all chemists and an internationally renowned Learned Society for the chemical sciences with 46,000 members worldwide. It is an international Learned Society for the chemical sciences with 46,000 members worldwide. It is an international Learned Society for the chemical sciences. It is a major international publisher of chemical sciences with 46,000 members world-wide. It is a significant effort to help teachers and students at all levels of education, by its services. There are six divisions of the RSC covering for specialist interests. The Education Division has around 4,800 members which enables chemistry teachers to be continually involved with curriculum developments and abreast of the latest teaching methods and learning aids. There are also 35 Local Sections of the RSC which cater for the local needs of members and organizes current, relevant talks, current local competitions.

THE ASSOCIATION OF THE BRITISH PHARMACEUTICAL INDUSTRY

The educational activities of ABPI members are designed to ensure that science is relevant, exciting and useful. The ABPI has a strong commitment to supporting the study of science in schools and colleges. The ABPI also provides information on careers in the pharmaceutical industry and routes into these areas of work. Career information: www.abpi.org.uk careers@abpi.org.uk
